What do we mean when we call a work of art `beautiful`? How have artists responded to changing notions of the beautiful? Which works of art have been called beautiful, and why? Fundamental and intriguing questions to artists and art lovers, but ones that are all too often ignored in discussions of art today. Prettejohn argues that we simply cannot afford to ignore these questions. Charting over two hundred years of western art, she illuminates the vital relationship between our changing notions of beauty and specific works of art, from the works of Kauffman to Whistler, Ingres to Rossetti, Cézanne to Jackson Pollock, and concludes with a challenging question for the future: why should we care about beauty in the twenty-first century?

Presents an overview of Western painting from ancient caves to the modern world and includes information on artists. Art in a commercial world -- Artists and collectors in the market for art -- The Italian City-States -- Antwerp -- Amsterdam -- Germany and Spain -- London -- Paris -- Art consumption in industrial America -- New York -- The global art market For nearly half a century, celebrated historian Ron Tyler has researched, interpreted, and exhibited western American art. This splendid volume, gleaned from Tyler's extensive career of connoisseurship, brings together eight of the author's most notable essays, reworked especially for this volume. Beautifully illustrated with more than 150 images, Western Art, Western History tells the stories of key artists, both famous and obscure, whose provocative pictures document the people and places of the nineteenth-century American West. The artists depicted in these pages represent a variety of personalities and artistic styles. According to Tyler, each of them responded in unique ways to the compelling and exotic drama that unfolded in the West during the nineteenth century—an age of exploration, surveying, pleasure travel, and scientific discovery. In eloquent and engaging prose, Tyler unveils a fascinating cast of characters, including the little-known German-Russian artist Louis Choris, who served as a draftsman on the second Russian circumnavigation of the globe; the exacting and precise Swiss artist Karl Bodmer, who accompanied Prince Maximilian of Wied on his sojourn up the Missouri River; and the young American Alfred Jacob Miller, whose seemingly frivolous and romantic depictions of western mountain men and American Indians remained largely unknown until the mid-twentieth century.

Other artists showcased in this volume are John James Audubon, George Caleb Bingham, Alfred E. Mathews, and, finally, Frederic Remington, who famously sought to capture the last glimmers of the “old frontier.” A common thread throughout *Western Art, Western History* is the important role that technology—especially the development of lithography—played in the dissemination of images. As the author emphasizes, many works by western artists are valuable not only as illustrations but as scientific documents, imbued with cultural meaning. By placing works of western art within these broader contexts, Tyler enhances our understanding of their history and significance.

Positions works of art in illustration groups to create a visual environment and historical context to enhance understanding and appreciation.

A study of a largely forgotten optical device and its relation to notions of opacity, transparency, and imagination.

A picture's title is often our first guide to understanding the image. Yet paintings didn't always have titles, and many canvases acquired their names from curators, dealers, and printmakers—not the artists. Taking an original, historical look at how Western paintings were named, *Picture Titles* shows how the practice developed in response to the conditions of the modern art world and how titles have shaped the reception of artwork from the time of Bruegel and Rembrandt to the present. Ruth Bernard Yeazell begins the story with the decline of patronage and the rise of the art market in the seventeenth and eighteenth centuries, as the increasing circulation of pictures and the democratization of the viewing public generated the need for a shorthand by which to identify works at a far remove from their creation. The spread of literacy both encouraged the practice of titling pictures and aroused new anxieties about relations between word and image, including fears that reading was taking the place of looking. Yeazell demonstrates that most titles composed before the nineteenth century were the work of middlemen, and even today many artists rely on others to name their pictures. A painter who wants a title to stick, Yeazell argues, must engage in an act of aggressive authorship. She investigates prominent cases, such as *David's Oath of the Horatii* and works by Turner, Courbet, Whistler, Magritte, and Jasper Johns. Examining Western painting from the Renaissance to the present day, *Picture Titles* sheds new light on the ways that we interpret and appreciate visual art.

“Why do artists love books?” This volume takes this tantalizingly simple question as a starting point to reveal centuries of symbiosis between the visual and literary arts. First looking at the development of printed books and the simultaneous emergence of the modern figure of the artist, *The Art of Reading* appraises works by the many great masters who took inspiration from the printed word. Authors Jamie Camplin and Maria Ranauro weave together an engaging cultural history that probes the ways in which books and paintings represent a key to understanding ourselves and the past. Paintings contain a world of information about religion, class, gender, and power, but they also reveal details of everyday life often lost in history texts. Such artworks show us not only how books have been valued over time but also how the practice of reading has evolved in Western society. Featuring over one hundred works by artists from across Europe and the United States and all painting genres, *The Art of Reading* explores the two-thousand-year story of the great painters and the preeminent information-providing, knowledge-endowing, solace-giving, belief-supporting, leisure-enriching, pleasure-delivering medium of all time: the book.

"A pioneering work in the field of art history, *The Image of the Black in Western Art* is a comprehensive series of ten books which offers a lavishly illustrated history of the representations of people of African descent from antiquity to the present. Each book includes a series of essays by some of the most distinguished names in art history. Ranging from images of Pharaohs created by unknown hands almost 3,500 years ago to the works of the great masters of European and American art such as Bosch, Dürer, Mantegna, Rembrandt, Rubens, Watteau, Hogarth, Copley, and Goya to stunning new media creations by contemporary black artists, these books are generously illustrated with beautiful, moving, and often little-known images of black people. Black figures—queens and slaves, saints and soldiers, priests and prisoners, dancers and athletes, children and gods—are central to the visual imagination of Western civilization. Written in accessible language, the extensive and insightful commentaries on the illustrations by distinguished art historians make this series invaluable for the general reader and the specialist alike."--Résumé de l'éditeur. This book explores many issues raised by the range of ideas and images of the natural world in Western art since the Renaissance. The whole concept of landscape is examined as a representation of the relationship between the human and natural worlds. Featured artists include Claude, Friedrich, Turner, Cole and Ruisdael, and many different forms of landscape art are addressed, such as land art, painting, photography, garden design, panorama and cartography.

Learning about art through the ages has never been as interesting or fun as in this humorous and very informative graphic novel. As two kids give their grandpa a tour of Paris, he starts an interesting conversation with them--about where all the art they see in their lives--from the movie house to the stadiums to museums and even the subway-- started. Dad's impromptu history lesson goes back to the first Cavemen drawings to the pyramids of Giza, and by the end of the book includes Greco-Roman feats of ingenuity and the frescoes of the Renaissance. Recounted as a narrative about why different civilizations created different kinds of art, centuries of art history are explored entertainingly for young readers. Iconic works, such as Donatello's David and The Book of Kells, are included as well as architectural feats like the Colosseum. Written by a tour guide for museums and historic landmarks, the text is designed to entertain (with many funny asides and jokes) as it informs. The illustrations accurately portray the art and the artists described, with flavor and humor added to keep readers turning the page. Reproductions of the featured artworks and information about each piece are included in the back, along with a glossary of terms.

This is a provocative essay of reflections on traditional mainstream scholarship on Chinese art as done by towering figures in the field such as James Cahill and Wen Fong. James Elkins offers an engaging and accessible survey of his personal journey encountering and interpreting Chinese art through Western scholars' writings. He argues that the search for optimal comparisons is itself a modern, Western

interest, and that art history as a discipline is inherently Western in several identifiable senses. Although he concentrates on art history in this book, and on Chinese painting in particular, these issues bear implications for Sinology in general, and for wider questions about humanistic inquiry and historical writing. Jennifer Purtle's Foreword provides a useful counterpoint from the perspective of a Chinese art specialist, anticipating and responding to other specialists' likely reactions to Elkins's hypotheses.

Written by a collective of female artists and art professionals, a unique, humorous guide explores and often corrects the male-centric history of classic Western art traditions by offering slightly altered renditions of works throughout the ages. Original.

Western Art and the Wider World explores the evolving relationship between the Western canon of art, as it has developed since the Renaissance, and the art and culture of the Islamic world, the Far East, Australasia, Africa and the Americas. Explores the origins, influences, and evolving relationship between the Western canon of art as it has developed since the Renaissance and the art and culture of the Islamic world, the Far East, Australasia, Africa and the Americas Makes the case for 'world art' long before the fashion of globalization Charts connections between areas of study in art that long were considered in isolation, such as the Renaissance encounter with the Ottoman Empire, the influence of Japanese art on the 19th-century French avant-garde and of African art on early modernism, as well as debates about the relation of 'contemporary art' to the past. Written by a well-known art historian and co-editor of the landmark Art in Theory volumes Spanning more than 2,500 years in the history of art, this book demonstrates how the rise and diffusion of the science of optics in ancient Greece and the Mediterranean world correlated to pictorial illusion in the development of Western painting from Hel

This book offers the first concentrated examination of the representation of the black female subject in Western art through the lenses of race/color and sex/gender. Charmaine A. Nelson poses critical questions about the contexts of production, the problems of representation, the pathways of circulation and the consequences of consumption. She analyzes not only how, where, why and by whom black female subjects have been represented, but also what the social and cultural impacts of the colonial legacy of racialized western representation have been. Nelson also explores and problematizes the issue of the historically privileged white artistic access to black female bodies and the limits of representation for these subjects. This book not only reshapes our understanding of the black female representation in Western Art, but also furthers our knowledge about race and how and why it is (re)defined and (re)mobilized at specific times and places throughout history.

In *The Rise and Fall of American Art, 1940s-1980s*, Catherine Dossin challenges the now-mythic perception of New York as the undisputed center of the art world between the end of World War II and the fall of the Berlin Wall, a position of power that brought the city prestige, money, and historical recognition. Dossin reconstructs the concrete factors that led to the shift of international attention from Paris to New York in the 1950s, and documents how 'peripheries' such as Italy, Belgium, and West Germany exerted a decisive influence on this displacement of power. As the US economy sank into recession in the 1970s, however, American artists and dealers became increasingly dependent on the support of

Western Europeans, and cities like Cologne and Turin emerged as major commercial and artistic hubs - a development that enabled European artists to return to the forefront of the international art scene in the 1980s. Dossin analyses in detail these changing distributions of geopolitical and symbolic power in the Western art worlds - a story that spans two continents, forty years, and hundreds of actors. Her transnational and interdisciplinary study provides an original and welcome supplement to more traditional formal and national readings of the period.

Looks at important movements and artists and discusses paintings, sculpture, photographs, and architecture.

The first in a two-volume survey, readers are invited to re-examine the history of the West and its art through a multi-faceted contemporary lens. More than 40 artists are included who reflect the tremendous diversity, depth, and breadth of a field steeped in history. While some follow the traditions established by Remington and Russell, others seek to break from tradition, busting myths and bringing new insights and artistic styles to the genre. They come from both sides of the Mississippi and have pedigrees that range from bona fide cowboy or Native American credentials to careers in commercial illustration. The unifying theme is a common concern for and commitment to their art and the West itself. In this volume, contemporary artists are featured whose work revolves around the American Cowboy. Within these pages, many different artists, some of whom have been cowboys themselves, exhibit their rendition of the wonderful world of the West.

Fascinated by the astonishingly rich history of art in hospitals, the well-known critic and art historian Richard Cork has written a brilliant account of the subject. These works, which include masterpieces of Western art, have been produced from Renaissance Florence and Siena to the 20th century. Piero della Francesca made a painting for a hospital in Sansepolcro, as did Hans Memling

in Bruges, Matthias Grünewald in Isenheim, El Greco in Toledo, Rembrandt in Amsterdam, William Hogarth in London, Vincent van Gogh in Saint-Rémy-de-Provence, and Marc Chagall in Jerusalem. The book's sumptuous images offer a rich range of subjects, from Francisco Goya's dramatic confrontations with suffering to Giovanni Battista Tiepolo's sublime, airborne celebrations of resurrection and heavenly ecstasy. Some, like Leonardo da Vinci's incisive drawings, are based on uncompromising firsthand study of hospital patients. Others explore a redemptive world where Christ is born, orphans are rescued, and plague victims are given shelter. In this wide-ranging survey, Cork investigates how such artworks have been used to humanize hospitals, to alleviate their clinical bleakness, and to offer genuine, lasting pleasure to patients, staff, and visitors. About the loss of Western art to a false art philosophy, nihilism, industrialization, and a corrupt art establishment. Art, tasteful aesthetics, high culture, & standards have all but vanished from the modern world. An ancient tradition has been carelessly discarded and is close to being lost forever. Why is this? Why were beauty values important to our ancestors? What was their philosophy of art, and what is ours? Can we bring back real art?

"Michael Sullivan is a master stylist. . . . His is one of those rare texts that take on the important task of assimilating the humanistic heritage of the East with our own heritage in the West."--Martin J. Powers, University of Michigan

The Art of Building has captured the interest of artists from the Roman period to today. The process of construction appears in western art in all its details, trades, and operations. Michael Tutton investigates the representation of building processes and materials through an examination of paintings, illuminated manuscripts, watercolours, prints, drawings and sculpture. Technical terms are explained and detailed interpretations of each work are provided, with insights into the artists' inspiration and themes. Even paintings not wholly or principally devoted to construction sites may give tantalising glimpses of building activity. How do these images convey meaning? How much is imagined; how much is authentic? Fully referenced endnotes, bibliography, and glossary complement the text and captions, informing not only the architectural and construction historian, but also those simply interested in art.

This history of art shows how painters, sculptors and architects have expressed the belief-systems of their age; religious, political and aesthetic. From the ancient civilizations of Egypt, Mesopotamia and Greece, to the revolutionary years of the nineteenth and twentieth centuries, the artist has acted as a mirror to the ideals and conflicts of the human mind.
