

Corporate Finance Ross Westerfield Jaffe 9th Edition Ebook

This text emphasizes the modern fundamentals of the theory of finance. It provides contemporary examples to help the theory come to life. Topics covered include: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return.

Corporate Finance: Core was developed for the graduate (MBA) level as a concise, up-to-date, and to-the-point product, the majority of which can be realistically covered in a single term or course. To achieve the objective of reaching out to the many different types of students and the varying course settings, corporate finance is distilled down to its core, while maintaining a decidedly modern approach. Purely theoretical issues are downplayed, and the use of extensive and elaborate calculations is minimized to illustrate points that are either intuitively obvious or of limited practical use. The goal was to focus on what students really need to carry away from a principles course. A balance is struck by introducing and covering the essentials, while leaving more specialized topics to follow-up courses. Net present value is treated as the underlying and unifying concept in corporate finance. Every subject covered is firmly rooted in valuation, and care is taken throughout to explain how particular decisions have valuation effects. Also, the role of the financial manager as decision maker is emphasized, and the need for managerial input and judgment is stressed. Fundamentals of Corporate Finance's applied perspective cements students' understanding of the modern-day core principles by equipping students with a problem-solving methodology and profiling real-life financial management practices--all within a clear valuation framework. KEY TOPICS: Corporate Finance and the Financial Manager; Introduction to Financial Statement Analysis; The Valuation Principle: The Foundation of Financial Decision Making; The Time Value of Money; Interest Rates; Bonds; Valuing Stocks; Investment Decision Rules; Fundamentals of Capital Budgeting; Risk and Return in Capital Markets; Systematic Risk and the Equity Risk Premium; Determining the Cost of Capital; Risk and the Pricing of Options; Raising Equity Capital; Debt Financing; Capital Structure; Payout Policy; Financial Modeling and Pro Forma Analysis; Working Capital Management; Short-Term Financial Planning; Risk Management; International Corporate Finance; Leasing; Mergers and Acquisitions; Corporate Governance MARKET: Appropriate for Undergraduate Corporate Finance courses.
