This second book in the Routledge Docalogue series continues to model a new form for the discussion of documentary film, focusing on a new film and a different set of critical questions. *Kedi* (2016) is the first feature documentary by Turkish-American filmmaker Ceyda Torun. The film provides a window into the everyday lives of Istanbul street cats; their itinerant meanderings present a non-human perspective on this ever-changing, ancient city while at the same time exploring the meaningful impact these cats have on the humans they encounter. *Kedi: A Docalogue* brings together a diversity of perspectives on this film. By combining five distinct critical approaches to a single documentary, this book acts both as an intensive scholarly treatment and as a guide for how to analyze, theorize, and contextualize a documentary. Together, the essays in this book touch upon key topics in documentary studies, including animal studies, eco-documentaries, sound studies, and media industry studies, making them essential reading for scholars interested in contemporary documentary. They also provide useful case studies for teaching documentary film in courses on Contemporary Cinema, Cultural Studies, and Media Industries.

Citizenship, indigenisation, inter-ethnic marriages and youthful exuberance are the core of *WHERE ARE YOU FROM?*. The novel questions the true meaning of federalism and highlights the frustration and disappointment young Nigerians face in their quest to

This book contributes to the innovation of writing education and research globally by providing crucial insights into how the structures and aims of literacy curricula vary internationally. It examines how nine education systems across five continents represent 'good writing' in curricula that shape students' experiences learning to write in school. The book presents curricular analyses aimed at providing insight into how writing development can be better supported through innovative policy and research. The findings regarding international variation are presented under three broad dimensions: social and contextual factors that shape writing curricula; the discourses of writing reflected in curricula and official documents; and hallmarks of classroom practice, including the relationship with official discourse. Case study chapters present integrated inductive and deductive document analyses, findings of which are compared in a concluding, cross-case analysis chapter. Offering a detailed comparative analysis of writing research, *International Perspectives on Writing Curricula and Development* will be of great interest to academics, researchers and students in the fields of education, literacy and curriculum studies. It will also be relevant reading for policymakers and curriculum designers.

HR metrics and organizational people-related data are an invaluable source of information from which to identify key trends and patterns in order to make effective business decisions. HR practitioners often, however, lack the statistical and analytical know-how to fully harness their potential. Predictive HR Analytics provides a clear, accessible framework with which to understand and work with people analytics and advanced statistical techniques. Step-by-step and by using worked examples, this book shows readers how to carry out and interpret analyses of various forms of HR data, such as employee engagement, performance and turnover, using the statistical packages SPSS (with R syntax provided), and, importantly, how to use the results to enable practitioners to develop effective evidence-based HR strategies. This second edition of Predictive HR Analytics has been updated to include new material on machine learning, biased algorithms, data protection and GDPR considerations, a new example using Kaplan Meier Survival analyses for tenure/turnover modelling and updated screenshots and examples with SPSS version 25. It is supported by a new

appendix showing main R coding for the focal analyses approaches in the book, and online resources consisting of SPSS and Excel data sets and R syntax with worked case study examples.

From the author of the beloved bestseller *The Dirty Life*, this “superb memoir chronicles the evolution of a farm, marriage, family, and her own personal identity with humor, insight, and candor” (Publishers Weekly, starred review) detailing life on Essex Farm—a 500-acre farm that produces food for a community of 250 people. *The Dirty Life* chronicled Kimball’s move from New York City to 500 acres near Lake Champlain where she started a new farm with her partner, Mark. In *Good Husbandry*, she reveals what happened over the next five years at Essex Farm. Farming has many ups and downs, and the middle years were hard for the Kimballs. Mark got injured, the weather turned against them, and the farm faced financial pressures. Meanwhile, they had two small children to care for. How does one traverse the terrain of a maturing marriage and the transition from being a couple to being a family? How will the farm survive? What does a family need in order to be happy? Kristin chose Mark and farm life after having a good look around the world, with a fair understanding of what her choices meant. She knew she had traded the possibility of a steady paycheck, of wide open weekends and spontaneous vacations, for a life and work that was challenging

but beautiful and fulfilling. So with grit and grace and a good sense of humor, she chose to dig in deeper. Featuring some of the same local characters and cherished animals first introduced in *The Dirty Life*, (Jet the farm dog, Delia the dairy cow, and those hardworking draft horses), plus a colorful cast of aspiring first-generation farmers who work at Essex Farm to acquire the skills they need to start sustainable farms of their own, *Good Husbandry* “considers what it means to build a good, happy life, and how we are tested in that endeavor” (Mary Beth Keane, New York Times bestselling author of *Ask Again, Yes*). Geared towards problem solving and problem recognition, this text details various aspects of operations management. It includes a discussion of multi-level distribution systems and production scheduling in large organizations, as well as productivity measurement and improvement.

This book fills a significant gap in the critical conversation on race in media by extending interrogations of racial colorblindness in American television to the industrial practices that shape what we see on screen. Specifically, it frames the practice of colorblind casting as a potent lens for examining the interdependence of 21st century post-racial politics and popular culture. Applying a 'production as culture' approach to a series of casting case studies from American primetime dramatic television, including ABC's *Grey's Anatomy* and The CW's *The Vampire Diaries*, Kristen Warner complicates our understanding of the cultural processes that inform casting and expounds the aesthetic and pragmatic industrial viewpoints that perpetuate limiting or downright exclusionary hiring norms. She also examines the material effects of actors of color who knowingly participate in this system and justify their limited roles as a consequence of employment, and finally speculates on what alternatives, if any, are available to correct these practices. Warner's insights are a valuable addition to scholarship in media industry studies, critical race theory, ethnic studies, and audience reception, and will also appeal to those with a general interest in race in popular culture. A consensus has emerged that corporations have societal and environmental responsibilities when operating transnationally. However, how exactly corporations can be held legally accountable for their transgressions, if at all, is less clear. This volume inquires how regulatory tools stemming from international law, public law, and private law may or may not be used for transnational corporate accountability purposes. Attention is devoted to applicable standards of liability, institutional and jurisdictional issues, and practical challenges, with a focus on ways to improve the existing legal status quo. In addition, there is consideration of the extent to which non-legal regulatory instruments may

complement or provide more viable alternatives to these legal mechanisms. The book combines legal doctrinal approaches with comparative, interdisciplinary, and policy insights with the dual aim of furthering the legal scholarly debate on these issues and enabling higher quality decision-making by policymakers seeking to implement regulatory measures that enhance corporate accountability in this context. Through its study of contemporary developments in legislation and case law, it provides a timely and important contribution to the scholarly and sociopolitical debate in the fast-evolving field of international corporate social responsibility and accountability.

Contemporary society is highly media-saturated, and no sector more so than sport. Drawing on case studies from the Tour de France to fitness apps, this book introduces the concept of 'mediatization' and examines how media - historically and currently - are significant drivers for social and cultural change in sport. Utilizing different analytical approaches, case studies illustrate how so-called legacy media have historically been involved in the establishment of the institution of sport and have persistently been heavily involved in structural changes in the same domain. However, digital media currently add significantly to the development of a more complex picture of globalized interdependencies and still growing media presence in all aspects of the everyday lives of both

sporting organizations, athletes and audiences/fans. The book seeks to eschew media centrism, acknowledging that changes are not only 'driven' by media but also related to other macro-social forces of change, such as globalization, commercialization, and individualization. Offering a new analytical framework, *Sport and Mediatization* enables students and scholars in the transdisciplinary field of media and sports studies to analyze and understand the influence of media in a much more complex environment.

It started off as a battle of wits. Me: the ordinary girl with a big mouth against Him: the sexy bastard with a big...ego. I thought I'd hit the jackpot when I was upgraded to first class on my flight to London. That is until HE sat next to me. Gabriel Scott: handsome as sin, cold as ice. Nothing and no one gets to him. Ever. He's a legend in his own right, the manager of the biggest rock band in the world, and an arrogant ass who looks down his nose at me. I thought I'd give him hell for one, long flight. I didn't expect to like him. I didn't expect to want him. But the biggest surprise? He wants me too. Only in a way I didn't see coming. If I accept his proposal, I leave myself open to falling for the one man I can't manage. But I'm tempted to say yes. Because the real man beneath those perfect suits and that cool façade just might be the best thing that's ever happened to me. And I just might be the only one who can melt the ice around

his heart. Let the battle begin...

How technology and community organizing can combine to help prevent violence, with examples from Chicago to Sri Lanka. Tunisian and Egyptian protestors famously made use of social media to rally supporters and disseminate information as the “Arab Spring” began to unfold in 2010. Less well known, but with just as much potential to bring about social change, are ongoing local efforts to use social media and other forms of technology to prevent deadly outbreaks of violence. In *The Technology of Nonviolence*, Joseph Bock describes and documents technology-enhanced efforts to stop violence before it happens in Africa, Asia, and the United States. Once peacekeeping was the purview of international observers, but today local citizens take violence prevention into their own hands. These local approaches often involve technology—including the use of digital mapping, crowdsourcing, and mathematical pattern recognition to identify likely locations of violence—but, as Bock shows, technological advances are of little value unless they are used by a trained cadre of community organizers. After covering general concepts in violence prevention and describing technological approaches to tracking conflict and cooperation, Bock offers five case studies that range from “low-tech” interventions to prevent ethnic and religious violence in Ahmedabad, India, to an anti-gang initiative in Chicago that

uses Second Life to train its “violence interrupters.” There is solid evidence of success, Bock concludes, but there is much to be discovered, developed, and, most important, implemented.

This unique and comprehensive book presents a unifying paradigm for understanding operations, based in the belief that a large part of operations management is the design and management of business processes. The overall objective of the book is to demonstrate how managers can control process structure and process drivers to achieve desired business process performance. This framework is applied to understand which levels managers have to control: cycle time, capacity, inventory, and quality. Providing a conceptual and logically rigorous approach, *Managing Business Process Flows* discusses the subject in three steps: model and understand the process and its flows; study causal relationships between process structure and certain performance metrics; and formulate implications for managerial actions by filtering out managerial levers (“process drivers”) and their impact on process performance. The book also identifies managerial levers, and establishes a connection between operational and financial measurements. An essential resource for all management professionals, especially Management Consultants specializing in operations and supply chains, Managers and VPs overseeing supply chains, and Plant

Managers. ÿ

Describes the key concepts of operations management, covering such topics as planning and control, the role of technology, and "just-in-time" techniques.
