Walker's disturbing memoir follows the relationship between the author (a psychiatrist) and his wife, Michelle, from its tumultuous beginning in 1985 to their ambivalent last good-bye three years later. The subtitle "a case study" attempts to maintain a professional distance from this devastating relationship, but it's all too clear that the illness from which Walker's wife suffered came close to dragging him down with her. Walker is first smitten by Michelle when, as a medical student, he encounters her on rounds, where she is presented as a recent suicide attempt. He can't understand how such a beautiful, sexy young woman would want to kill herself and returns to interview her for a school presentation. Despite warnings from his teacher, friends and father, he falls deeply in love and is drawn into her world, only to emerge with great difficulty a year later. Walker, an outgoing, athletic, cheerful young man, relinquishes more and more of himself to Michelle and gradually becomes isolated, depressed, devious and even violent as he tries to cope with-and ultimately escape from-Michelle.

opponents in a bitter struggle, or pitying them as emotional invalids, Valerie Porr cites cutting-edge science to show that BPD is a true neurobiological disorder and not, as many come to believe, a character flaw or the result of bad parenting. Porr then clearly and accessibly explains what BPD is, which therapies have proven effective, and how to rise above the weighty stigma associated with the disorder. Offering families and loved ones supportive guidance that both acknowledges the difficulties they face and shows how they can be overcome, Porr teaches empirically-supported and effective coping behaviors and interpersonal skills, such as new ways of talking about emotions, how to be aware of nonverbal communication, and validating difficult experiences. These skills are derived from Dialectical Behavior Therapy and Mentalization-based Therapy, two evidence-based treatments that have proven highly successful in reducing family conflict while increasing trust. Overcoming Borderline Personality Disorder is an empowering and hopeful resource for those who wish to gain better understanding of the BPD experience--and to make use of these insights in day-to-day family interactions. does it last? What other problems co-occur with BPD? Overviews what we currently know about BPD make up the first section of the book. Later chapters cover several common treatment approaches to BPD: dialectical behavior therapy (DBT), mentalization-based therapy (MBT), and medical treatment using psychoactive drugs. Are you trapped in a toxic relationship? Have you been led to believe that it's you who's always wrong? Are uncontrolled emotions isolating you and destroying everything they touch? Are you afraid of what will happen if you decide to break out of your relationship? Being in a relationship with a person who has a borderline personality means living a love-hate relationship that's obsessive, complicated and unstable. Unfortunately, these kinds of relationships can be particularly difficult to escape from. However long the relationship has lasted, a relationship with a person who has BPD typically creates a destabilizing impact on the psyche of those who live with it, and leaves emotional wounds that are very difficult to heal. Sadly, sometimes, these relationships produce more than just psychological wounds. Stalking, threats and physical violence are all possibilities when a person breaks up with someone who has a serious borderline personality disorder. Threats of

suicide, self-harm or even revenge attempts are all common issues in such situations. Sufferers of BPD live at the limit, they are acrobats in a precarious balance on a razor's edge. This book is essential reading if, in the last three months, a person that you are close to has been overwhelmed by: Anxiety, depression and anger, often for reasons that others find difficult to understand or that they consider inconsequential. Intense or uncontrollable emotional explosions. Instability in interpersonal relationships and self-esteem. Concerns about abandonment. Desperate feelings of being misunderstood. Feelings of powerlessness and despair. Ideas about self-harm and/or suicide. Doubts about themselves and their sanity. DO THE FOLLOWING SYMPTOMS PLAY FAMILIARLY IN YOUR FAMILIES? A person who comes into close contact with a sufferer of BPD will, over time, be exposed to a variety of manipulative behaviours. Normally the BPD sufferer will use sophisticated manipulation techniques in order to decline even the most minor of life's responsibilities. To put it briefly, as suggested by one of my readers, "BPD people put their entire lives in your hands and then blame you and punish you if something goes wrong." BPD is a black hole of attention and affection. Nothing can fill this void. The person closest to the BPD victim can experience the following feelings that prevent that person from moving away from their BPD: They will feel used and manipulated. They will be forced to

sacrifice their personal needs in a dedicated existence, devoted to the sufferer of BPD. Concern about what will happen to the BPD sufferer if I leave. How will the BPD sufferer react to a break up? Will they try to self-harm or commit suicide? If I abandon the BPD sufferer, then 'I am the bad person' who has been selfish, and disregarded him, so what he says is true. There are many other situations that are listed within this book. Knowing the right information allows you to limit the damage and avoid unnecessary suffering. This book is not the solution to all your problems, but I GUARANTEE that if you read and carefully review all the chapters of this book, ABSORB all the tips and finally APPLY the techniques provided by this manual, you will immediately feel a feeling of relief and you will have all the tools you need to rebuild a relaxed and peaceful life.
